REMARKS.

(a.) The details of column 18 are—

	Acres.
Dalwa	1,317
Cotton	2,629
Huldee	15
Wheat	2
Garden produce ...	63
Moong	8
China	5
Oil-seeds	132
Sugarcane ...	176
Other crops, *i. e.*—	
Brinjal ...	15
Plantains ...	4
Saru ...	1
Garden Nut ...	1
	197
Total ...	4,367

* In last month's return 4 acres were included under the heading "Sugarcane and other Crops." This area has been excluded from columns 15, 16 and 17, and included in column 9 of this return.

FORT WILLIAM,
The 23rd June 1875.

G. A. SEARLE, *Lieut.-Colonel, S. C.,*
Offg. Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

Steady demand for indigo and sugar-cane crops. Heavy storms with easterly winds.

Eastern Jumna Canal.—Steady demand throughout the month, area under sugar-cane smaller than last year, the frost having damaged seed.

Dun Canals.—No remarks.

Rohilkhand Canals.—No remarks.

Traffic.—Steady decline in the grain traffic both up and down, as also a general falling off in other items except oil-seed and salt.

Allahabad,
The 24th June 1875.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR THE YEAR 1873-74.

No. 198—213 I, dated Simla, the 3rd July 1875.

READ—

Letter from the Government of the Punjab, Public Works Department, Irrigation Branch, No. 5071 I, dated 22nd December 1874, forwarding a copy of the Revenue Report of Irrigation Works in the Punjab for the year 1873-74, and of the Resolution of that Government reviewing the same.

OBSERVATIONS.—The submission of this report is nearly a month behind time. The delay is attributed to the non-receipt of the statements of accounts from the Controller's Office in time to be used by the Superintending Engineers in the preparation of their reports. The Accountant General, Public Works Department, will be instructed to report on the cause of the delay.

2. The operations of the year having been reviewed in detail by the local Government, only the general results and a few points requiring attention will be noticed here.

3. In the abstract of general financial results annexed to the Chief Engineer's report there are some errors which will be separately remarked on. The correct figures will be found in the two accompanying statements, the first of which shows the results according to the actual cash receipts during the year, and the second according to the assessments for the year. The amounts shown as "indirect" or enhancements of land revenue due to the irrigation will probably be subject to alterations on account of remissions of demands and other causes, which will not, however, materially affect the general financial results. From the above statements it appears that—

	£
On the whole the total capital outlay on Irrigation Works in the Punjab to the end of 1873-74 has amounted to	2,684,279
Of this amount, the sum spent on canals under construction is ...	798,182
Leaving as the capital outlay on works in operation, including the Madhopoor workshops	1,886,097
The net return derived by Government from these works by direct receipts from water-rates and miscellaneous items of income, and after deduction of working expenses during 1873-74, and after providing for an adjusting charge of £29,109 for the Madhopoor Workshops, is	48,555
And the increased land revenue due to the works is reported to amount to	96,856
The result being a net profit of	145,411

or 7·72 per cent. on the capital outlay—a decrease of 1·14 per cent. from the result of the previous year. This is due to an increase in the capital outlay of £108,317 and a decrease in the net receipts of £5,962.

4. The decrease in the receipts is accounted for by a diminution of the area irrigated during the year, the causes of which are shown to be in the case of the permanent canals a fairly abundant rainfall generally, and in one instance also to a temporary decrease of cultivation owing to a revision of the land revenue being in progress; and on the inundation canals to an exceptionally unfavorable condition of the rivers, which rose late and fell early—contingencies to which works of this nature are occasionally liable.

5. On the Western Jumna Canal the decrease in the last two years below the average is very marked, owing mainly, it would appear, to the disturbing influence of the land settlement operations, which however is not likely to continue long. Unsatisfactory as the result is as regards the canal finances, it is not, as remarked by the Chief Engineer, an unmitigated evil, the effect being

most beneficial in many instances to the land which required rest after years of continuous cultivation and over-irrigation.

6. The Baree Doab Canal, though not up to the standard to be expected from it, still shows an area of 3,350 acres in excess of the previous year. The income from water power on this canal, it is satisfactory to observe, is rapidly increasing,—having reached the sum of Rs. 34,204 in the year under review, or more than double the return from this source two years ago.

7. Of the inundation canal series, the Upper Sutlej shows the largest decrease. In addition to the causes affecting all these works equally, the introduction of new water-rates and system of assessing for the first time during the year under review tended to lessen the area irrigated from this series.

8. On the whole, considering the adverse influences at work during the year, the results are fairly satisfactory.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Secretary of State, and to the Financial and Revenue, Agriculture and Commerce Departments for information.

Ordered also, that copies of the Resolution be forwarded to the Government of the Punjab, and the several other* local Governments and Administrations in the Public Works Department, Irrigation Branch, for information, and to the Accountant General, Public Works Department, for the purpose indicated in para. 1.

* Madras.	British Burmah.

(a). In the Finance accounts the amount shown in this column as revenue due to the Upper Sutlej Inundation Canal was £6,354, but it has since been explained by the Government of the Punjab that the amount was erroneous.
(b). The correction of the entry in (a) causes a difference of £6,354 between these amounts and the amount shown in the Finance accounts.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department,—No. 5032 I., dated 21st December 1874.

Read—

Revenue Report for 1873-74 by Chief Engineer, Irrigation Works, with enclosures.

RESOLUTION.—The expenditure brought to account during the year has added a sum of Rs. 13,23,819 to the capital debit of the works under the control of the Irrigation Department, including such as are yielding income, and those under construction which now yield no revenue, but excluding such portions of the Sirhind Canal as are debitable to Native States. The sum expended on account of these States amounts to Rs. 25,44,921. If to the above interest charges be added, the Controller's account shows that the Capital Account of Government Irrigation Works in the Punjab has been increased by Rs. 21,86,025, and that it amounted at the end of the year to Rs. 3,85,90,349, or a little short of four millions sterling. Including interest, the portion of the increase debitable to the Government works yielding income amounted to Rs. 13,36,083.

2. Canal water was in less demand than usual; and the area of irrigation in the districts watered by the Western Jamna Canal was intentionally diminished in the erroneous hope of evading the operation of the revised assessment of land revenue. The result has been that 164,315 acres less were irrigated in 1873-74 than in 1872-73. The principal falling off has been in the irrigation under Inundation Canals; but that is due to the fact that during 1872-73 this was exceptionally high. In 1873-74 it returned nearly to its normal amount; whereas the irrigation under permanent canals, which in 1872-73 had fallen very much below its average, fell again to the extent of 36,723 acres in 1873-74.

3. The net revenue credited to the canals during the year, including the owner's rate, amounted to Rs. 15,75,404, which is about 8·45 per cent. on the capital expended to the end of 1872-73. When interest is added, however, the capital debit is increased from Rs. 1,77,56,580 to Rs. 3,05,05,460 for canals yielding income. Of this latter amount the net revenue is only about 5·35 per cent. It is to be noted, however, that as yet the "owner's rate" has not been fully credited to the canals. In canals which may hereafter be constructed the realization of "owner's rate" for irrigated lands will prevent much of the excessive accumulation of interest, by which the Capital Account of the irrigation works in this province has been so greatly enlarged.

4. The rainfall and areas irrigated during the past eight years were as follow:—

SERIES OF CANALS.	1866-67.	1867-68.	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.

Permanent Canals...	675,592	593,492	786,713	730,470	741,917	731,455	580,616	543,893
Inundation „ ...	324,945	431,674	376,270	530,940	464,299	431,749	573,522	445,930
TOTAL ...	1,000,537	1,025,166	1,162,983	1,261,410	1,206,216	1,163,204	1,154,138	989,823

5. The most remarkable feature in this statement is the simultaneous diminution in the rainfall and in the areas watered by Inundation Canals in the southern portions of the province. This is due to the fact that this kind of irrigation being imperfect and uncertain, the lands watered by it are partly dependent upon rainfall, by which, when plentiful, its deficiencies are supplied. The case is different under permanent canals wherever rainfall is also not very small. There a plentiful rain is a rival of the canals, though not a completely successful one in any portion of the plains of the Punjab.

6. Owing to the diminution in the area irrigated, the working expenses are not so low as they would have been if the area had not fallen below its average.

7. As usual, the Western Jamna Canal brings in a handsome return in 32·17 per cent., credit being taken for the "owner's rate." The Lower Satlaj and Chináb Inundation Canals bring in a net revenue of no less than 162·34 per cent. on the capital expended, excluding accumulated interest. On the total capital, including interest accumulated, the net returns are for the Western Jamna Canal 15·5 per cent., and for the Lower Satlaj and Chináb Inundation Canals 105 per cent.

WESTERN JAMNA CANAL.

8. The area of irrigation on this canal is less than that of the previous year by 40,074 acres, mainly due to the reduction in the cotton crop and partly in wheat crop. The former reduction is chiefly to be attributed to the state of the market, the latter to the rainfall during

the rabbi season being sufficient, without much aid from irrigation, to mature the crops. The areas of the principal crops irrigated during the last six years were as follow :—

Principal crops.	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	38,435	45,126	39,877	31,325	40,566	42,068
Rice	33,491	46,705	45,863	32,974	43,144	43,818
Cotton	74,875	80,093	98,446	100,951	96,131	54,806
Wheat	209,980	177,300	182,072	181,573	93,600	86,355
TOTAL ...	356,781	349,224	366,258	346,823	273,441	227,047

9. The area under wheat has, it will be seen, fallen from 209,980 acres in 1868-69 to 86,355 acres in 1873-74, the greatest reduction having been from 181,573 in 1871-72 to 93,600 in 1872-73. It appears, however, from the last year's Revenue Report that there was an equally sudden rise from 100,937 acres in 1867-68 to 209,980 in 1868-69, due, no doubt, to an increased demand during the scarcity in the neighbouring districts during the latter year. There has been a marked increase in the area under indigo, which amounted to 12,165 acres.

10. The duty obtained from the water this year was small, owing to an abundant supply and a limited demand for water.

11. The outstanding balance of collections was reduced from Rs. 3,30,394 to Rs. 1,81,555, which is satisfactory.

12. There has been a reduction in the working expenses, as compared with the previous year, from Rs. 4,01,178 to Rs. 3,72,982.

DELHI AND GURGAON WORKS.

13. With the "owner's rate" these works, which have hitherto appeared to be maintained at a loss, now shew a gain. The area irrigated has increased from 11,087 acres in 1872-73 to 16,533 in 1873-74. This is chiefly due to a more plentiful supply of rain, upon which these works, situated in a very dry district, depend.

UPPER BARI DOAB.

14. The net revenue from this canal, direct and indirect, amounts to 3·77 per cent. of the capital expended, excluding accumulated interest, and about 2·29 per cent. on the capital, including accumulated interest. The capital on which the former percentage is calculated is greater by Rs. 2,58,280 than that on which the percentage for 1872-73 was calculated, owing to expenditure on the Sobráon and Kasúr Branches which did not yield income.

15. The areas irrigated during the past five years were as follow :—

	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
	Acres.	Acres.	Acres.	Acres.	Acres.
Kharíf	115,524	88,643	76,412	96,718	100,913
Rabbi	118,403	190,567	210,658	132,078	131,233
Total ...	233,927	279,210	287,070	228,796	232,146

16. Owing partly to the abundant and seasonable rain, and probably also to the state of the market, there has been but a small increase in the area irrigated. This, it will be seen by the next table, has taken place in sugarcane, rice and cotton, the area under wheat having slightly diminished. The latter, as under the Western Jamna Canal, fluctuates considerably from year to year.

Principal crops.	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	9,811	11,623	6,904	6,287	9,170	10,305
Rice	41,256	76,709	24,535	11,598	29,100	32,882
Cotton	8,205	11,671	10,640	20,387	24,879	27,868
Wheat	175,619	87,399	156,375	167,214	99,417	94,731
Total ...	234,891	187,402	198,544	205,486	162,566	165,786

17. The area irrigated per cubic foot per second utilized appears less than it was last year. Colonel Brownlow has pointed out, moreover, that the figures which have hitherto been given by the Executive Engineer as representing this area need correction. His attention is being directed to this matter, which is important from a statistical point of view.

18. The mill rents, an increase in which was noticed in last year's Revenue Report, have again increased. In the last two years this item of revenue has more than doubled. It is satisfactory to note that there is reason to expect that it will continue to increase.

19. The balance of unrealized revenue has this year been reduced by Rs. 6,930.

INUNDATION CANALS.

Upper Satlaj Series.

20. During 1873-74 new rates of assessment were introduced, and the measurements for assessment were for the first time conducted by the Patwáris or Village Accountants. The supply of water was also unusually low. The result of these several causes has been a diminution in the area irrigated, and a small decrease in the income. With an average area of irrigation, and with the new rates, the income will exceed the outlay, and the financial results of these canals will appear in a more favorable light than they have done hitherto.

Lower Satlaj and Chinab Series.

21. Including "owner's rate" the net revenue for the year 1873-74 has amounted to Rs. 1,70,778, or 162·34 per cent. on capital, excluding interest accumulated. Of the capital, including accumulated interest, the net revenue amounts to 105 per cent.

22. The areas in acres irrigated during the last six years were as follow :—

	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Kharíf	142,849	157,504	133,365	127,472	149,143	108,528
Rabbi	56,614	85,590	68,671	60,993	93,361	88,536
Total ...	199,463	243,094	202,036	188,465	242,504	197,064

23. The increase of the previous year has, it will be seen, been nearly lost again in 1873-74. There was a decrease in all crops, except wheat, owing to a short supply during the kharíf season.

24. The cost of maintenance during the last three years has been—

	Rs.
For 1871-72	0·76
„ 1872-73	0·67
„ 1873-74	0·83

The increase in the last year is due to the area irrigated having been less than it was in the previous year.

Indus Series.

25. Including the share of the land revenue due to the canals, the net income amounts to Rs. 62,175, or nearly 14·2 per cent. on the capital, excluding accumulated interest, or 9·65 per cent. on the capital, including accumulated interest.

26. The areas in acres irrigated during the last five years were as follow :—

	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
	Acres.	Acres.	Acres.	Acres.	Acres.
Kharíf	103,207	125,186	104,872	132,818	115,590
Rabbi	25,970	49,156	39,462	47,319	47,430
Total ...	129,177	174,342	144,334	180,137	163,020

27. There has been a decrease in the year of 17,117 acres, of which 15,751 are on the lands producing millets; the differences in wheat, cotton, indigo and rice, are trifling. Since 1870 the area under indigo has nearly doubled, while that under rice has been reduced by 36 per cent. The variations in the other crops mentioned above have been small as between the two years 1870 and 1873.

SHAHPUR CANALS.

28. The area irrigated by these two canals was 4,079 acres, or 366 acres less than in 1872-73. The net income amounted to Rs. 1,148, or 5·41 per cent. of the capital debited against the canals.

By order of the Hon'ble the Lieutenant Governor,

P. O'CONNELL, Colonel, R. E.,
Offg. Joint-Secy. to Govt. Punjab, P. W. D.,
Irrigation Branch.

CHIEF ENGINEER'S REVIEW OF REVENUE REPORTS FOR 1873-74.

WESTERN JAMNA CANAL CIRCLE.

Western Jamna Canal.

1. The debit to Capital, exclusive of interest, was increased by Rs. 2,25,228. Of this, the expenditure on works was as follows :—

	Rs
Jamna dam and head works	75,317
New distributaries	10,944
Surveys	724
New pipe tiles	5,808
Land for Superintending Engineer's office	9
Jagadhri chauki and Pandoe nallah	3,265
Total ...	96,067

The remainder consists of charges for establishment and tools and plant, and balances of suspense accounts.

2. *REVENUE ACCOUNT CURRENT.

EXPENDITURE.	Rs.	RECEIPTS.	Rs.
Extensions and improvements ...	694	Water-rate on irrigation	8,10,302
Maintenance and repairs	1,11,465	Miscellaneous	41,594
Plantations	8,003		
Compensation	1,313		
Establishment—Executive	1,92,419		
Direction	55,937		
Tools and Plant	3,151		
Total ...	3,72,982		
Balance, profit @ 15·36 per cent. on Capital, Rs. 31,16,931	4,78,914		
GRAND TOTAL ...	8,51,896	GRAND TOTAL ...	8,51,896
		Land Revenue irrigated	3,72,563

3. The profit for the year therefore amounts to Rs. 4,78,914, or 15·36 per cent. on the capital debit at beginning of the year without taking the enhanced land revenue into consideration; adding this the income becomes Rs. 8,51,477, or 27·32 per cent. on the capital.

4. The results for the past three years are as follow :—

		1871-72.	1872-73.	1873-74.
		Rs.	Rs.	Rs.
INCOME	Water-rates on irrigation ...	10,83,758	9,03,116	8,10,302
	Miscellaneous	*47,552	*47,782	41,594
	TOTAL ...	11,31,310	9,50,898	8,51,896
EXPENDITURE	Works, &c.	98,749	1,43,762	1,24,628
	Establishment—Executive ...	*2,28,211	2,05,540	1,92,419
	Direction ...	*49,494	51,876	55,935
	TOTAL ...	3,76,454	4,01,178	3,72,982
PERCENTAGE ON CAPITAL FROM NET	Direct income	27·04	18·44	15·36
	Direct plus indirect ...	53·07	30·95	27·32

* Corrected as per Financial Results.

5. The unsatisfactory decrease is due to the diminished area irrigated: the expenditure being Rs. 28,196 less than during the previous year.

6. The areas in acres irrigated during the year 1873-74 and the four preceding years were as follow :—

	Kharif.	Rabbi.	Total.
1869-70	234,464	262,078	496,542
1870-71	218,535	244,172	462,707
1871-72	187,647	256,738	444,385
1872-73	202,371	149,450	351,821
1873-74	171,630	140,117	311,747

7. The Superintending Engineer, in the 34th paragraph of his report, attributes the decrease of irrigation to an increased and unseasonable rain-fall, and to the fact that the settlement operations were in progress in the Karnál, Delhi and Rohtak Districts. The kharíf crop has suffered from the Zamíndárs not sowing cotton, owing to the price not giving them a sufficient return.

8. An examination of the statement of rain-fall during the year 1873-74 will show that, except in the Rohtak and Hissár Districts, the fall was considerably greater than that in the previous year, which in turn was above the average, especially in the districts where there is most irrigation. The season may therefore be fairly considered singularly unfavorable.

9. A very great part of the decrease may also be attributed to the disturbing influence caused by the revision of settlements. As noted by the Superintending Engineer, large numbers of villages resigned the canal water, and threw their land out of cultivation, in order that they might be lightly assessed. This was duly reported, and the settlement and canal officers were authorized to explain to the leading men that they would gain nothing by the course they had adopted, because it was intended to assess all the land as unirrigated (baráni), and to impose an owner's rate in lieu of the enhancement of land revenue due to the presence of the canal water. This has already to some extent had the desired effect, half of the villages having applied to be re-admitted to the privilege of using canal water.

10. The decrease of irrigation on this account is by no means an unmitigated evil, though the canal has thereby lost revenue. The land in most instances urgently required a rest to recover from the exhaustion consequent on over-cropping, and the evils resulting from over-irrigation have been somewhat checked.
